Environmental and Sustainable Development Policy Statement

(This policy covers all provision including the follow ESF funded Project)

Solent SSW ESF (MITSkills are a subcontractor)

Date established:	March 2009
Updated:	August 2020
Reviewed:	Annually Reviewed 200921
Purpose:	This policy aims to set out MITSkills position regarding its approach to good environmental practice

MITSkills recognises the importance of good environmental practice as part of good management. Therefore, wherever MITSkills carries out its business, it seeks to adopt best practice in, and where appropriate, develop innovative solutions to environmental issues.

To implement this Policy on environmental matters and sustainability, MITSkills is committed to follow the principles set out below and through them promote sustainability: **(ESF 12)**

- We will encourage management systems and procedures designed to promote sustainable development and seek to prevent activities and/or conditions that pose a threat to health and the environment.
- We will consider the environmental impact of our business decisions.
- We will seek to minimise the use of raw materials, supplies and energy and, where possible, will use renewable or recyclable materials.
- We will comply with applicable environmental laws and regulations and will implement internal programmes and procedures to ensure compliance.
- We will work constructively with appropriate agencies in the implementation of sound environmental policies.
- We will ensure that we have a management lead sustainability plan aligned to the good practice outlined in the ESF technical guidance and encourage learners, subcontractors, and staff to participate in our organisational plan, and wider environmental and sustainability within the United Kingdom.
- Delivery subcontractor will be required to evidence the commitment to sustainability and/or to meet specific contractual requirements in accordance with the legislation or customer lead requirement, including promotion of sustainability aims.
